

### REAL ASSETS INTO NFT'S

Omnia Defi aims to become the leading tokenisation platform, creating the world's largest real-world tradable assets index. The company envisions universal access to wealth creation and already has \$500M in fine art and real estate committed to the project.

### OUR PRODUCTS

**\$OMNIA**

**OMNIA Tokens (\$OMNIA)** are exchange and utility tokens within the system for tokenisation efficiency.

**OATs**

**Omnia Asset Tokens (OATs)** are asset tokens tied in smart contract to the physical real-world assets underlying their value.

**OSCs**

**Omnia Stable Coins (OSCs)** are stablecoins pegged to the US Dollar with all pooled OATs as underlying value.

### THE PROBLEM

Lengthy, costly property sale

Unaffordable real estate

Illiquid assets

1.7 B adults unbanked

Volatility in crypto

Wealth generation is inaccessible to large numbers of people. Millennials struggle to buy their own homes. Capital loans are not available to the unbanked to start or run a business. The crypto market can be an unpredictable and volatile alternative.

### WHO CAN BENEFIT?

Our tokens enable people with modest incomes to fractionally buy into high-value assets and build wealth. The unbanked can tokenise to register assets and raise business capital. Collectively with tokenisation the general population can fund infrastructure projects that significantly benefit both the local and global economies.

### MARKET SIZE

**\$50.1 Billion**  
Global art market

**\$280.6 Trillion**  
Real estate market

**4 Billion**  
Only 1% of 4 billion buildings digitised

### OUR SOLUTION

Omnia DeFi makes wealth creation accessible by enabling the unbanked to register assets and by making buying and selling high-value assets affordable and user-friendly for everyone, via tokenisation. We bring stability to cryptocurrency by directly linking our tokens to real-world assets and pegging our stablecoins to the U.S. Dollar.

### MOON VAULT, MOON BURN

**1 Million Tokens to the Moon**

Augment Reality with 1 Million AR Tokens to the Moon by 2030

**50% token burn**

50% of tokenisation onboarding fees are used for buyback & burn of Omnia tokens

**15% static reflection**

Omnia Token holders will earn passive revenue in USDT by simply keeping their tokens in their wallet.
